

PRODUCT INFORMATION

HYDRAULIC CLUTCH JACK - 130KG

The Borum Industrial 130kg Hydraulic Clutch Jack is perfect for earthmoving equipment and truck clutch and/or flywheel installation and removal. It features two fully adjustable splines, smooth, manually operated hydraulic lifting and lowering and four 360° swivel caster wheels for better load positioning. The ergonomic multi position rotating jacking handle makes overall maneuverability simple and efficient in a busy workshop.
